

Kidus Yonas

Software Engineering Student — Backend-Focused Software Developer

PROFILE

Software Engineering student

with a strong interest in backend and full-stack web development. Experienced in building RESTful APIs, and working with databases. Passionate about clean code, problem-solving, and continuously learning modern web technologies. Seeking a software development internship.

EXPERIENCE

Academic & Personal Projects — Software

Developer

Addis Ababa, Ethiopia — 2024 – Present

- Developed backend systems using Django and Django REST Framework for web applications.
- Implemented secure authentication and authorization protocols using JWT.
- Designed and managed databases using MySQL and SQLite for efficient data storage.
- Built and tested API endpoints using Postman to ensure reliability.

PROJECTS

EdgeForge — Trading Web Application

Market Insights & Trade Analysis — *Live Demo*

- Built EdgeForge, a trading web application that provides market insights and trade analysis tools for users.
- Developed backend services using Django and Django REST Framework, handling user data, trade tracking, and application logic.
- Implemented features such as user authentication, trade journaling, and real-time data handling, with API testing done using Postman.

Kfits — E-commerce Web Application

Online Retail Service

- Developed Kfits, an e-commerce web application for browsing and purchasing products online.
- Built backend functionality using Django, including product management, user authentication, and order handling.
- Implemented key features such as product listings, shopping cart, and checkout flow, with data managed using MySQL/SQLite.
